

DAMSL: Dialog Act Markup in Several Layers

Hui Shi

- Literature

James Allen and Mark Core (1997): Draft of DAMSL:
Dialog Act Markup in Several Layers

- Preliminaries

- two participants (speaker and listener)
- task-oriented dialogs
- a dialog is divided into **turns**
- a turn may consist of several **utterances**
- the **tag(s)** of an utterance is(are) based on the speaker's intentions

- Dimensions of utterance tags
 - Communicative Status – records whether the utterance is intelligible and whether it was successfully completed
 - Information Level – a characterization of the semantic content of the utterance
 - Forward Looking Function – how the current utterance constraints the future beliefs and actions of the participant
 - Backward Looking Function – how the current utterance relates to the previous discourse

- Communicative status

- Uninterpretable

- Abandoned

- Self-talk

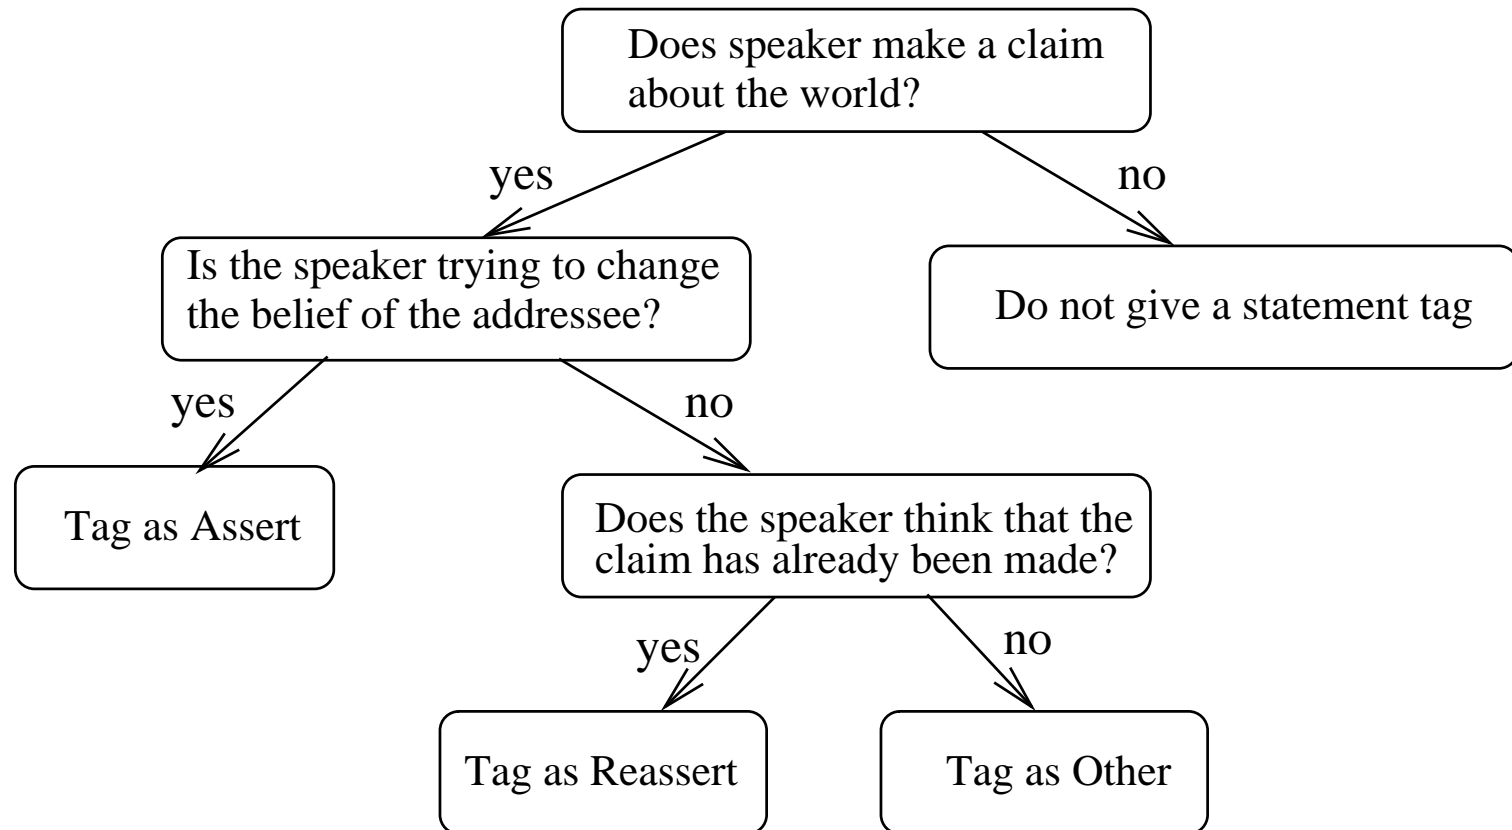

Abandoned	utt1	u	so I pick up
-----------	------	---	--------------

	utt2	u	can I take oranges um on tankers from Corning
--	------	---	---

- Information level

- Task (“Doing the task”)
- Task-management (“Talking about the task”)
e.g., “Forget about that problem for a while”, “Are we done?”
- Communication-management (“Maintaining the communication”)
e.g., “hello”, “ok”, “let’s see”
- Other-level

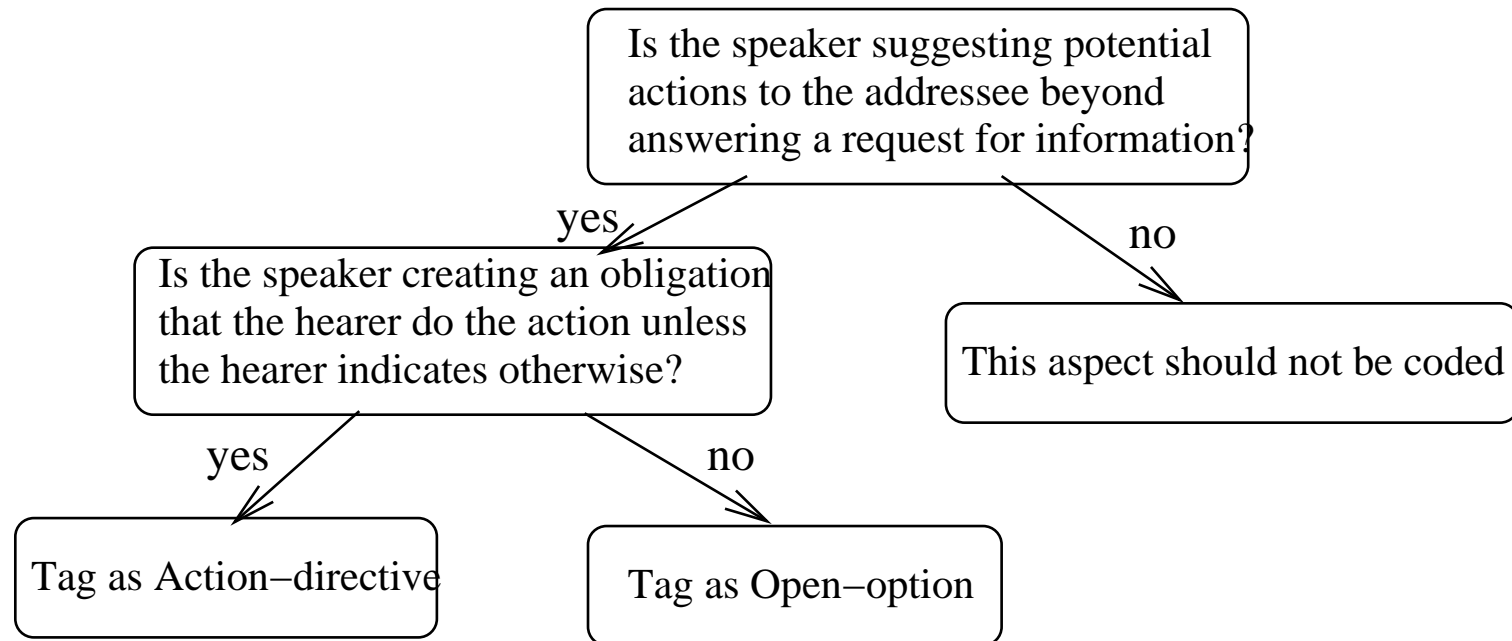

- **Forward Looking Function** characterizes what effect an utterance has on the subsequent dialogue
 - Statement
 - ▷ Assert
 - ▷ Reassert
 - ▷ Other-statement

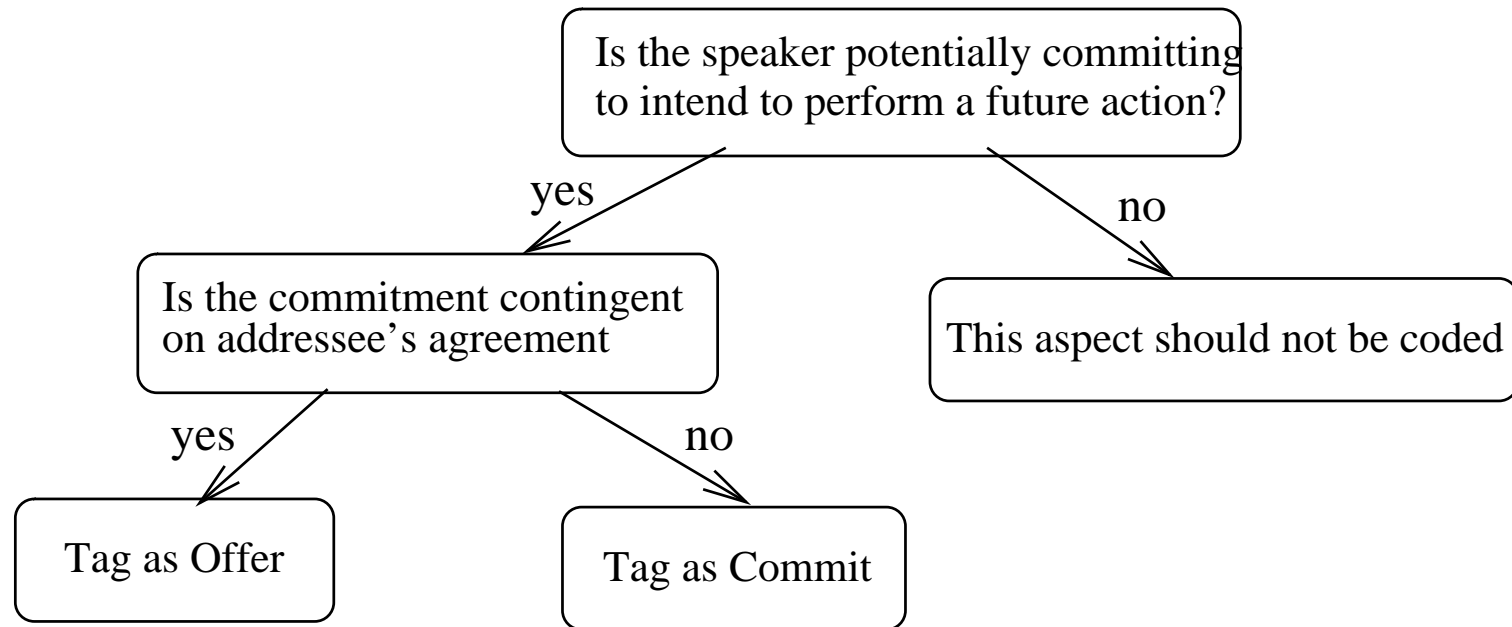

- Influencing-addressee-future-action

- ▷ Open-option

- ▷ Action-directive

- Info-request
- Committing-speaker-future-action
 - ▷ Offer
 - ▷ Commit

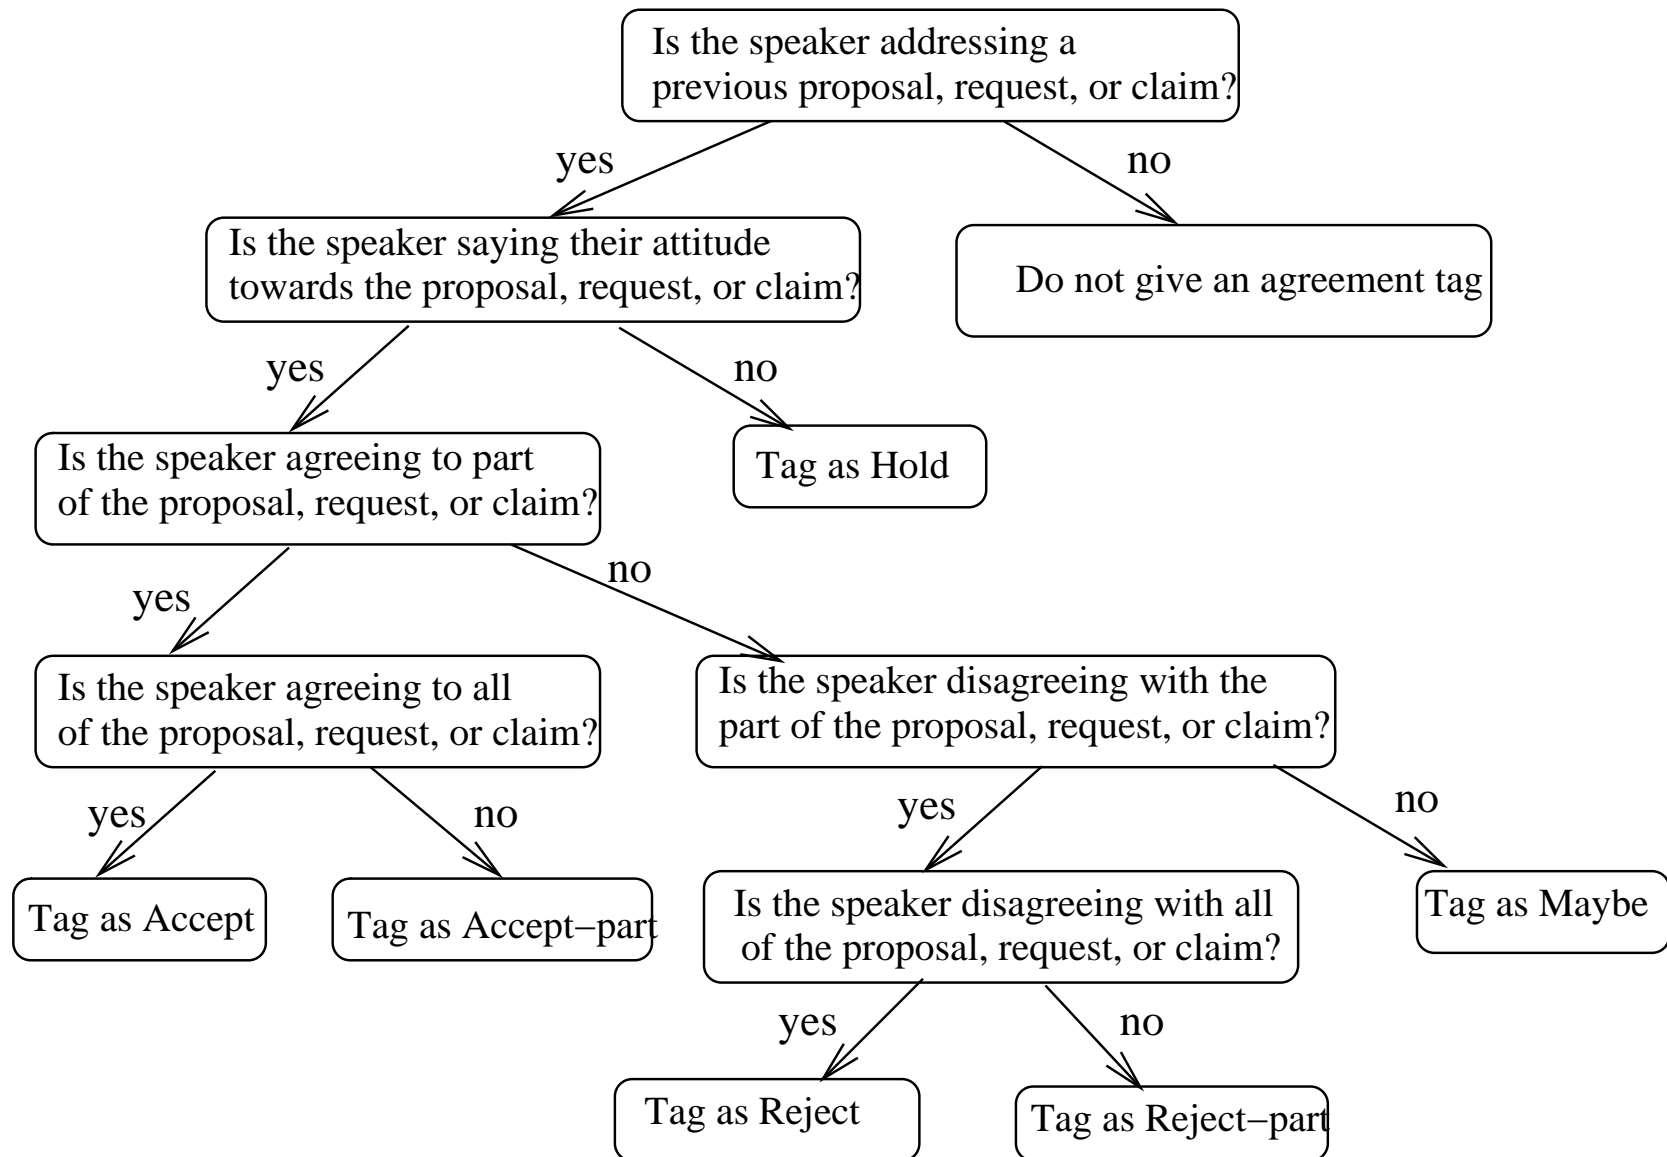

- Conventional
 - ▷ Opening
 - ▷ Closing
- Explicit-performative
- Exclamation
- Other-forward-function

Action-directive	utt1	A	Let's buy the living room furniture first
Commit	utt2	B	OK
OO, Assert, Offer	utt3		I have a red sofa for \$150 or a blue one for \$200

Assert	utt1	A	I don't know what to do Saturday night
OO	utt2	B	You could go to Bob's party with me
Commit	utt3	A	Great I'll see you there

- **Backward Looking Function** indicates how current utterance relates to the previous discourse.
 - Agreement
 - ▷ Accept
 - ▷ Accept-part
 - ▷ Maybe
 - ▷ Reject-part
 - ▷ Reject
 - ▷ Hold

- Understanding
 - ▷ Signal-non-understanding
 - ▷ Signal-understanding
 - Acknowledge
 - Repeat-rephrase
 - Completion
 - ▷ Correct-misspeaking
- Answer
- Information-relation

Assert	utt1	C	I need to travel in May.
Info-request, Ack	utt2	A	And, what day in May did you want to travel?
Assert, Answer	utt3 utt4	C	Ok uh I need to be there for a meeting that's from the 12th to the 15th.
Info-request, Ack	utt5	A	And you're flying into what city?
Assert, Answer	utt6	C	Seattle.
Info-request, Ack	utt7	A	And what time would you like to leave Pittsburgh?
Hold	utt8	C	Uh hmm I don't think there's many options for non-stop.
Accept, Ack	utt9	A	Right.
Assert	utt10		There's three non-stops today.
Info-request	utt11	C	What are they?
Assert, OO	utt12	A	The first one The second flight departs PGH at 5:55pm, arrives Seattle at 8pm. . . .
Accept, Ack	utt13	C	OK I'll take the second flight on the 11th.
Info-request, Ack	utt14	A	On the 11th? OK. Departing at 5:55pm arrives Seattle at 8pm, U.S. Air flight 115.
Ack	utt15	C	OK.

- Multi-dimensional problems

Task	utt1	u	take the boxcar to Corning
Task, Accept	utt2	s	okay

Task-Management	utt1	u	let's work on the oranges plan first
Task-Management, Accept	utt2	s	okay
