- Multimodal cohesion analyses
- Relations between comics & film
- Document Design & Critique
- Narratology and visual narration
- Film and materiality

research oriented & interdisciplinary
Master programme

Applications are invited for the multimodal linguistics specialization of the Bremen University Language Sciences Masters programme.

Courses introducing the fundamentals of multimodal linguistics are followed by individual and group-oriented research projects in multimodality.

Particular specializations include film, comics, visual narrative, and static and dynamic documents

Application prerequisites: a BA or equivalent in linguistics or a related discipline
